Sydney, New South Wales, Australia

MY RESEARCH

My research expertise lies in Human-Computer Interaction in Virtual Reality and Augmented Reality. My research interests are how humans react to complex immersive environments and interfaces, how interactions enable communication with immersive spaces, and different alternative input methodologies in Virtual and Augmented reality. I am currently investigating the design of different interfaces and interactions for multiplatform XR visualization systems. Other research interests include locomotion in VR, VR sickness, and game technologies.

EDUCATION

Ph.D. Human-Computer Interaction

2021

University of Technology, Sydney

Thesis Title: Providing Safer Virtual Reality Experiences with the Help of Brain-Computer Interfaces

Advisor: Distinguished Professor CT-Lin

Co-Advisor: Dr. Tim Chen

Msc Computer Game Engineering

2015

Newcastle University

Thesis Title: Just-in-time collaborative path-finding for AI agents

B.S. Engineering in Information and Communication Technologies

2012

Instituto Tecnológico y de Estudios Superiores de Monterrey, Campus Laguna

RESEARCH EXPERIENCE

Lecturer in Interaction Design

October 2024 - Present

Discipline of Design, Sydney School of Architecture, Design and Planning

The University of Sydney

I currently follow three main research streams. First, I work on using Mixed Reality as a tool for disaster resilience during extreme weather events. Second, I try to understand cybersickness and its effects on the human body while walking in virtual environments. Third, I study how body kinematics can be interaction inputs with multiple elements of the metaverse, such as virtual avatars or the teleoperation of robots.

ARC Laureate Postdoctoral Fellow in Intelligent Visualization

February 2021 - September 2024

iCinema Centre for Interactive Cinema Research

The University of New South Wales

Through my time at iCinema, I mainly worked under the Laureate Project *iFire*. The project focused on building an Intelligent Visualization System capable of realistically depicting the behaviour of wildfires. One of the project's main achievements was developing data processing and visualization pipelines for wildfire data. Led the design of interactive methods that help enable the system to be used by firefighter training academies.

Research Support

August 2017 - December 2020

Computer Intelligence and Brain-Computer Interfaces Centre

University of Technology, Sydney

I Worked as research support on topics complementary to my main PhD research. I participated in three research projects. One was spatial navigation in VR, where I helped develop experiments to study the cognitive processes of navigation and workload inside VR systems. The second project was navigation techniques for AR systems, where I worked on creating a HoloLens app with a novel AR navigation technique. I worked on a neurofeedback pain relief project, where I worked on a neurofeedback system intended to modulate spinal cord pain with an EEG-controlled video game. Other responsibilities included the development of Unity VR/AR apps to be used for research experiments.

PhD Candidate

February 2017 - August 2020

Computer Intelligence and Brain-Computer Interfaces Centre

University of Technology, Sydney

My thesis focused on the user's physical safety while interacting with a VR scene. I investigated the two main safety issues of VR systems: postural instability and VR sickness. My focus was understanding the body kinematics of postural imbalance in VR users and its relationships with common EEG signals. The thesis's main findings were that EEG signals can be used to detect VR sickness and, in conjunction with other sensors such as body trackers, postural instability.

TEACHING EXPERIENCE

Lecturer in Interaction Design October 2024 - Present

Discipline of Design, Sydney School of Architecture, Design and Planning
The University of Sydney

[**Subject Coordination**]: I coordinated subject IDEA9103: Creative Coding for semester 1, 2025.

[**Teaching**]: I taught the subjects of Creative Coding and Introduction to Design in Virtual Reality.

[**Capstone Research Students**]: I mentored one master's student for their capstone project in Human-Computer Interaction. I mentored one external capstone student in data analytics at the University of Adelaide and one external capstone student in the University of Technology, Sydney, in Virtual Avatars.

Casual Academic August 2017 - December 2020

School of Computer Science, Faculty of Engineering and IT
University of Technology Sydney

[**Teaching**]: A series of courses through the School of Computer Science such as .Net Application Development, Software Engineering Studio I, II, III; Introduction to Computer Graphics, and Interactive Media.

[**Capstone Supervision**]: Supervised one capstone student in developing Android Mobile Applications.

PROFESSIONAL EXPERIENCE

• **iCinema Research Deputy Director** 2022 - 2024
iCinema Centre for Interactive Cinema Research/The University of New South Wales Sydney, Australia

- Performed Administrative roles like center reports and meeting chairing.
- Representing center in Faculty's Engagement and Impact committee.
- Research Support for grant writing.
- Communication with national and international stakeholders.
- Research project management and student mentoring.

• **Unreal AR/VR Developer** 2020
7DX Sydney, Australia

- Development of AR, VR and Mobile Applications using Unreal Engine.

• **Android Developer** 2016 - 2017
Cratebind LLC Remote

- Development of multiple Android applications for multiple stakeholders.

• **Android Developer and Founder** 2015
Five or Less Newcastle Upon Tyne, UK

- Find multiple funding streams to fund our project.
- Development of a mobile platform for iOS and Android.

• **Software Engineer** 2013 - 2014
Cytruss Enterprise Management Gomez Palacio, Mexico

- Part of the software research team in developing new products for the company.
- Development of multiple Android applications for internal projects.

• **Android Mobile Developer** 2013
El Directorio MX Torreon, Mexico

- Development of multiple Android and .NET projects for the *El Directorio* platform.

COURSES AND CERTIFICATIONS

- **Sydney XR Research Methods Summer School** [Sydney Human-Centered Computing Group] January 2025
- **Introductory Statistics for Researchers Using R** [Stats Central UNSW] July 2022

SERVICE

- **Demo Chair**, OzCHI 2025 2025
- **Local Arrangements Chair**, IEEE International Symposium on Mixed and Augmented Reality (ISMAR) 2023
- **Meta Review Chair**, International Conference on Quality of Multimedia Experience 2022
- **Co-Editor**, MDPI Electronics Special Issue on "Advances in Augmenting Human-Machine Interface" 2021
- **Conference Reviewer:**
 - ACM CHI (2022, 2025)
 - ACM CHI Late-Breaking Work (2020 - 2022, 2025)
 - ACM Virtual Reality Software and Technology (2019, 2022)
 - IEEE ISMAR (2021 [**highly useful review award**], 2024)
 - IEEE VR (2020 - 2025)
 - SIGGRAPH Poster Track (2024)
- **Journal Reviewer:** IEEE Transactions in Visualization and Computer Graphics (2021), MDPI Electronics (2020-2021)
